Concurrent users, Perpetual license & Migration of option

Concurrent Users: Means unlimited no. of users can created with different rights under one company in every option but limited no. of users will be allowed to login simultaneously. For example, if 5 concurrent users' option is chosen, maximum 5 users of that particular company will be able to login at any particular time simultaneously, 6th person will have to wait till one of the 5 already logged in, logs out. So if the staff strength is large in a company, a larger no. of concurrent users' option should be chosen so that the working is not hampered at peak hours.

*The employee strength (No. of employees) is not restricted in any option.

Even in single user option, the company can work for unlimited employees, software will not restrict anywhere.

Perpetual license option come with a perpetual license agreement by default which is free of license renewal cost year by year for life.

Addition of concurrent users: More users can be added anytime
